

Alternative metrics: median depth and inundation volume
Less sensitive to discrete wet-cell threshold crossings

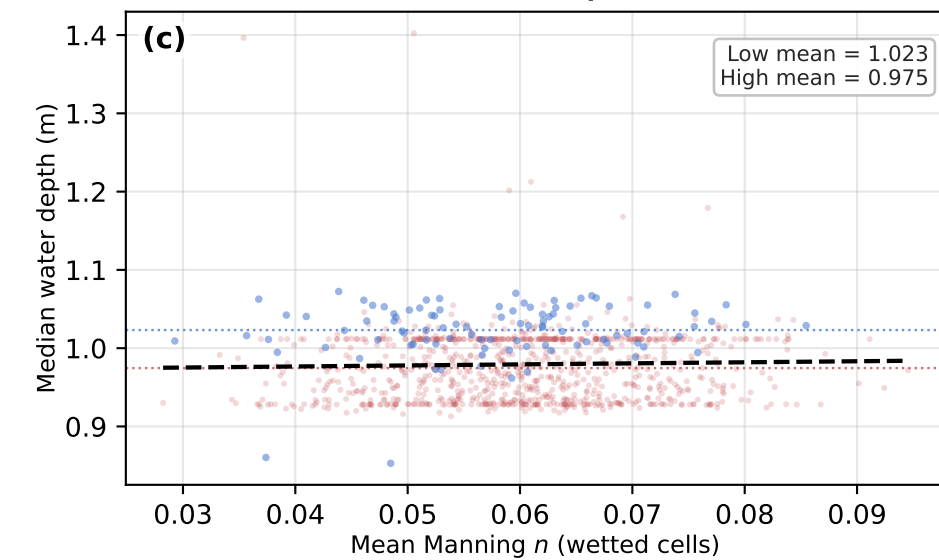

SFINCS — median depth (CV=5.8%)

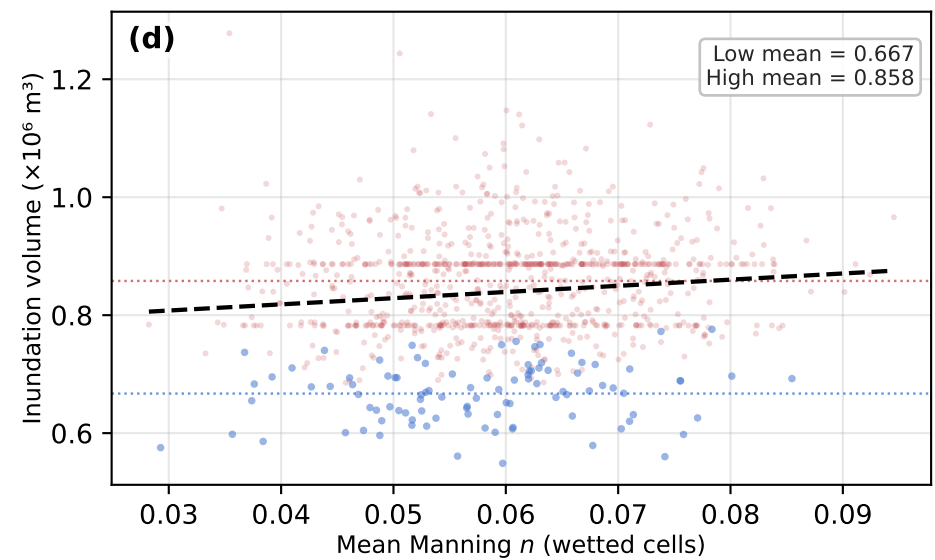

SFINCS — inundation volume (CV=4.8%)

HEC-RAS — median depth (CV=4.6%)

HEC-RAS — inundation volume (CV=11.7%)

● Low regime (N=97) ● High regime (N=898) - - $r = 0.03, p = 0.317$
